

YUSEF SYED

Toronto, ON | U.S. and Canadian citizen | Open to relocation
(484) 957-0661 | yusefmsyed@gmail.com | github.com/YusefSyed | [LinkedIn](#)

Education

University of Toronto

Expected May 2030

Mathematics and Computer Science (Intended Double Major)

Faculty of Arts & Science, first-year Mathematical & Physical Sciences

Current coursework: programming, calculus with proofs, linear algebra, statistical reasoning. Prior: Data Structures, Lehigh Carbon Community College (dual enrollment).

Research Experience

Incoming Undergraduate Researcher

Fall 2026 - Winter 2027 (Planned)

University of Manitoba, Department of Statistics | Supervisor: Prof. Pankaj Bhagwat

- Planned supervised research in statistical modeling, alongside study of the field's theoretical foundations.

Open Source Contributions

Open-Source Contributor | Merged PRs

Aug 2026 - Present

- Contributed **10 merged upstream PRs** across Microsoft Agent Lightning, Microsoft PyRIT, W&B RAI Toolkit, Meridian Labs Inspect Scout, and Kornia.
- Fixed duplicate authorization headers in Microsoft Agent Lightning's sync/async clients; added request-level regression tests for case-insensitive replacement and header preservation.
- Open PyTorch PR (AI-assisted): added CPU/CUDA shape gradients for incomplete gamma; author-run tests checked two derivatives on 581 inputs across macOS CPU, Linux CPU, and CUDA.

Selected Projects

Aesthetics AI | [App Store](#) | [Case study](#)

May 2026 - Present

React Native, Expo, PostgreSQL, RevenueCat

- Released an iOS fitness app with AI photo reports, training plans, progress tracking, and subscriptions.
- Built workout-save and atomic-sync improvements; **47 local behavioral tests** covered retries, rollback, concurrent writes, restart recovery, and account isolation.

CallReclaim | [Case study](#)

Jul 2026 - Present

TypeScript, Next.js, PostgreSQL, Twilio

- Built a missed-call recovery MVP with authenticated Twilio webhooks, consent-aware messaging, AI lead extraction, and an owner-scoped dashboard.
- Implemented PostgreSQL reconciliation and a durable outbox; locally tested duplicate callbacks, concurrent processing, cross-business isolation, and worker-crash recovery.

Tiraz | [ML study](#)

Jun 2026 - Present

React Native, Python, PyTorch

- Built an iOS wardrobe app with outfit feedback, closet recommendations, and subscriptions; conducted a separate annotation-only garment-category completion study.
- Trained three seeded set encoders on 27,683 Fashionpedia groups; reached **58.5-59.0%** top-1 accuracy versus a **52.7%** co-occurrence baseline on 962 held-out groups.

Agent Eval Mutation Lab | [GitHub](#)

Aug 2026 - Present

Python, Inspect, Docker, SQLite

- Built a resumable evaluation harness for **13 synthetic cases** under four evidence conditions, with Docker-isolated tools and independent SQLite checks of executed effects.
- Ran a **624-trial study** across two local models using a pre-specified protocol; withheld improvement claims after finding unequal invalid-output rates between prompting conditions.

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL

Frameworks and data: React Native, Next.js, PyTorch, Inspect, PostgreSQL, SQLite

Tools and testing: Git, GitHub Actions, Docker, pytest, mypy, Codex

Leadership

Feeding the Valley | Vice President

2025 - 2026

Helped coordinate a 60+ volunteer initiative that raised \$20,000 and prepared 1,700 meals for local food banks.

FIRST Robotics Team 834 | Fundraising Lead

2022 - 2026

Supported fundraising and outreach efforts totaling \$5,000+ raised and 2,000+ prospects contacted. The team competed at the FIRST Championship in 2023 and 2025.
